How To Read This Report

This report lists all the patients that have visited your store more than 18 times over the year
This indicates that the patient does not have their meds synchronized.

What should I do with this Information?

- Step 1 : Bring up each patient in your dispensary system
- Step 2 : Get authority from the Doctor to line up all Rx's OR Dispense smaller amounts to line up the dates and minimize visits
- Step 3 : Set up Refill Reminders to make sure that the patient refills on time

How will doing this help my Business and my Patients?

Synchronizing a patient's meds helps your workflow by reducing unnecessary visits
Patients will find picking up all their meds together more convenient and easier to manage
resulting in better outcomes.
Extra time saved can be used to provide cognitive services
